this study explores the design and application of natural language text based processing systems based on generative linguistics empirical copus analysis and artificial neural networks it emphasizes the practical tools to accommodate the selected system

this work examines noam chomsky s widely accepted ontological assumptions now referred to as biolinguistics and demonstrates that they are internally inconsistent notably it is shown that chomsky himself has at least once admitted this flaw additionally the volume challenges a fundamental assumption from chomsky s 1950s linguistic writings this is the claim that the grammars of natural languages particularly of english must be constructive proof theoretic devices usually called generative grammars it is shown that this persistent view cannot in principal account for a multitude of linguistic structures realized as perfectly natural sentences finally the work scrutinizes chomsky s frequent assertion that there is essentially only one language spoken on earth revealing it to have no actual substance the exposition of these flaws calls for a reassessment of fundamental aspects of generative linguistics
